JOYCE WANGUI KIMANI

Junior Software Developer

Nairobi city, Kahawa West | +254 794 454 417 | joycewangui580@gmail.com

LinkedIn: linkedin.com/in/joyce-kimani | GitHub: github.com/wanguinyiha

OBJECTIVE

Applied Programming Technology student, graduating Fall 2027, with hands-on experience in web development and databases. Seeking a software developer internship to apply my skills in JavaScript, Typescript and React while gaining practical experience in system design, full-stack development and collaborative software engineering and contributing to real-world, high impact software solutions.

SKILLS

Languages and Frameworks: Python, JavaScript, TypeScript, PHP, SQL, HTML, CSS.
Frameworks & Libraries: React, Next.js, Laravel
Databases & Backend Services: PostgreSQL, Supabase, Convex
Software development methodologies: Agile/Scrum.
Cloud & DevOps: Docker, Kubernetes
Version Control & Development Tools: Git, Github, VSCode
Collaboration and Design Tools: Zoom, Jira, Google Workspace, Figma

PROJECTS AND PORTFOLIO

Explore my portfolio for software development projects demonstrating my practical experience in web development, database integration, and application development.

EXPERIENCE

IT & Tech Support Volunteer
Elimutab
Zoho CRM - ElimuTab: Utilized Zoho CRM to manage customer information, monitor sales, track invoices, and document customer interactions, contribute to better organization of customer data, improved sales visibility, streamlined customer follow-ups, and more efficient business operations. This provided practical experience in applying enterprise technology to solve real-world business and customer management needs.

Volunteer
Bishop Opera Luigi Zimmerman
Supported the center's donation management process by accurately recording donated items, quantities, and donor information. Maintained organized records that supported inventory tracking, resource planning, and efficient distribution of supplies, while developing practical skills in data entry, record management, accuracy, and information organization.

EDUCATION

MORINGA SCHOOL

Software Engineering and DevOps

UNITED STATES INTERNATIONAL UNIVERSITY – AFRICA (USIU) *Expected Fall 2027*

Bachelor's in applied computer technology.

ACHIEVEMENTS

Developed Web Applications – Built and managed web applications using Next, React.js, Node.js, and Python.

Completed a Software Engineering Program – Successfully studied software engineering and computer science, gaining strong problem-solving and programming skills.
