SUMMARY

Applied Programming Technology student, graduating Fall 2027, with hands-on experience in web development and databases. Seeking a software developer internship to apply my skills in JavaScript, Typescript and React while gaining practical experience in system design, full-stack development and collaborative software engineering and contributing to real-world, high impact software solutions

EXPERIENCE

IT & Tech Support Volunteer
Elimutab

- Utilized Zoho CRM to manage customer information, monitor sales, track invoices, and document customer interactions, contribute to better organization of customer data, improved sales visibility, streamlined customer follow-ups, and more efficient business operations.

Volunteer
Bishop Opera Luigi Zimmerman

- Supported the center's donation management process by accurately recording donated items, quantities, and donor information. Maintained organized records that supported inventory tracking, resource planning, and efficient distribution of supplies.

EDUCATION

Software Engineering and DevOps
Moringa School

Bachelor's in applied computer technology
United States International University – Africa (USIU)

SKILLS

Languages and Frameworks

Python JavaScript TypeScript
PHP SQL HTML CSS

Frameworks & Libraries

React Next.js Laravel

Databases & Backend

PostgreSQL Supabase Convex

Cloud & Devops

Docker Kubernetes

Collaboration & Design Tools

Jira Google Workspace Zoom
Figma

KEY ACHIEVEMENTS

Developed Web Applications
Built and managed web applications using Next, React, Node.js and python

Completed a Software Engineering Program -
Successfullly studied software engineering gaining strong problem-solving and programming skills
